Patrick Autocare Opens New State of The Art Vehicle Logistics Facility in Perth

Perth, Australia: Patrick Autocare today showcased its continued commitment to client service with the unveiling of its new state of the art vehicle logistics facility in Perth.

The gateway building to the Perth Airport Precinct, Patrick Autocare's new 6,200 m² facility consolidates its previous existing sites into one purpose built facility, to act as a convenient hub for vehicle processing, storage and transport.

For more than 30 years, Patrick Autocare has provided complete and comprehensive services to manufacturers and national dealer networks throughout Australia. Now with the opening of its new WA facility, you can expect the same seamless premium service you've come to know, along with improved work and storage capabilities - delivering savings in time, cost and space.

With 300 per cent more storage, and three times more work space, the facility is capable of housing more than 2,500 vehicles under cover and a total of up to 8,500 vehicles in storage. Home to more than 70 staff, the facility includes the main processing building and 1,300 square metres of commercial office space over two floors and four separate support buildings. What's more, for the first time, onsite maintenance facilities and a quarantine accredited wash bay are all found under the one roof.

The cutting edge design, with its innovative hail mesh design and construction, is the result of a collaborative design process with Westralia Airport Corporation, DNA Architects and Patrick Autocare.

Says Alex Milan, Patrick Autocare General Manager, "We're extremely pleased to officially unveil the new Perth facilities. At Patrick Autocare, we pride ourselves on delivering premium services, and now we're proud to have a premium facility to match.

"We'd like to thank all our customers for their ongoing support over the last five years. With the launch of these new Perth facilities, we can ensure we are well placed to help your business drive continued growth into the future," he concluded.

The new Patrick Autocare facility is located at 2 Abbot Road, Perth Airport.
